

Gandham Rama Krishna Durga Prasanna

Kakinada, Andhra Pradesh, India

prasanna444177@gmail.com | +91 7416819522 | [LinkedIn](#) [Github](#)

Professional Summary

Data Science undergraduate with hands-on experience in designing and deploying machine learning and AI solutions using Python, SQL, and modern ML frameworks. Skilled in data preprocessing, feature engineering, predictive modeling, and model evaluation, with practical experience in Deep Learning, Natural Language Processing (NLP), Computer Vision, and end-to-end ML application development. Proficient in building scalable ML pipelines, deploying models through APIs, and solving real-world business problems using data-driven approaches. Passionate about continuous learning and applying AI to create impactful, production-ready solutions.

Education

Bachelor of Technology – Data Science

Aug 2023 – Present

Aditya University, Surampalem | CGPA: 8.71

Board of Intermediate (12th)

2023

Sri Sai Aditya Junior College, Kakinada | Percentage: 83.7%

Secondary School (10th)

2021

Ravindra Bharathi School, Pithapuram | Percentage: 96.3%

Technical Skills

Languages: Python, C, Java (Foundational), SQL (Basics)

Machine Learning: Supervised & Unsupervised Learning, Data Preprocessing, Feature Engineering, Model Evaluation

Deep Learning: Tensor flow, Neural Networks, Keras

Data Science: Data Analytics, Data Visualization

Tools: Git, GitHub, VS Code, Docker, MlFlow, Streamlit

Projects

- **AI-Powered Context-Aware Safety Monitoring System** [Github](#)
- Developed a real-time AI surveillance system using YOLOv8, DeepSORT, MediaPipe Pose, and LSTM to detect suspicious and unsafe activities from CCTV video streams.
- Built an end-to-end application with FastAPI, React, and PostgreSQL for live monitoring, instant alerts, event logging, and real-time safety analytics..
- **Transformer Encoder from Scratch with Attention Visualization** [Github](#)
- Built a Transformer Encoder from scratch using PyTorch by implementing scaled dot-product attention, multi-head attention, and positional encodings.
- Developed a Streamlit dashboard to visualize attention heatmaps and attention-head behavior for model interpretability.
- **Persistent-Memory AI Academic advisor with MCP server and vector search** [Github](#)
- Developed a memory-enabled AI advisor using FastAPI, implementing a Retrieval-Augmented Generation (RAG) pipeline to deliver context-aware responses beyond LLM memory limitations.
- Designed a hybrid memory architecture with SQLite and ChromaDB for structured storage and semantic retrieval, and containerized the application using Docker

Internship Experience

Machine Learning Intern – 1stop.ai

- Built a machine learning model for Human Action Detection by analyzing accelerometer and gyroscope sensor data.
- Applied data preprocessing, feature engineering, and model evaluation techniques to accurately classify human activities.

AI Engineer Intern – Day Learner Pvt Limited

- Developed an AI-powered CCTV surveillance system using YOLOv8, DeepSORT, MediaPipe Pose, and LSTM for real-time suspicious activity detection.
- Implemented a FastAPI–React pipeline for live video monitoring, instant alerts, and event management.

Certifications

Introduction to Python (Red Hat) | Java Foundations (Oracle) | Machine Learning (LinkedIn Learning)

Languages: English, Telugu
