ABOUT ME

I am a Data Science student with a strong interest in solving real-world problems using data and technology. I enjoy working on diverse projects involving data analysis, machine learning, and full-stack development based on project requirements. I am passionate about continuous learning and improving my skills through hands-on implementation. I am also interested in MLOps concepts like experiment tracking, deployment, and building reproducible workflows. I focus on writing clean, structured solutions and collaborating effectively in team environments.

EDUCATION

- BACHELOR OF TECHNOLOGY- DATA SCIENCE [CGPA:8.67]**
ADITYA UNIVERSITY Surampalem
2023 - 2027
- INTERMEDIATE [PERCENTAGE:83.7]**
Sri Sai Aditya junior College
Kakinada
2021 - 2023
- SECONDARY SCHOOL[CGPA:9.63]**
Ravindra Bharati School
Pithapuram
2021

SKILL

- C Programming
- Python
- Exploratory Data Analysis
- Data Visualization
- Data Structures and Algorithms
- Machine Learning
- Deep Learning
- TensorFlow, scikit-learn
- Large Language Models
- Pandas, NumPy, Matplotlib

TOOLS

JupyterNotebook ,VS Code
Git,Docker,MIFlow,FastAPI,Swagger UI

EXPERIENCE

- Machine Learning Intern-IStop.ai
- Worked on Human Action Detection using sensor data
 - Hands-on experience in model training and evaluation

PROJECTS

Human Action Detection-Machine Learning

Built a Human Action Detection system using accelerometer and gyroscope sensor data to classify activities like walking, sitting, standing, and lying. Performed preprocessing and trained classification models, evaluating performance using accuracy and other metrics for fitness and healthcare applications.

Autoencoder for Anomaly Detection

Developed an unsupervised anomaly detection system using an autoencoder neural network in TensorFlow on the Thyroid Disease dataset. The model was trained exclusively on normal samples to learn underlying patterns, and anomalies were detected based on reconstruction error using a percentile-based threshold. Implemented feature scaling, model evaluation using precision, recall, and F1-score, and visualized results through reconstruction error distributions, confusion matrix, and PCA-based latent space analysis.

ML Workflow for Classification-MLflow

Developed a production-ready MLOps workflow for a classification model using MLflow for experiment tracking, model versioning, and Model Registry integration, and deployed a Dockerized FastAPI-based prediction service orchestrated with Docker Compose to ensure reproducibility, scalability, and reliable model serving.

AI Academic Advisor with MCP Architecture

Developed a memory-enabled AI advisor to provide context-aware responses by overcoming LLM memory limitations. Designed a hybrid system using SQLite for structured data and ChromaDB for semantic retrieval with embeddings. Implemented a Retrieval-Augmented Generation pipeline to utilize past interactions for improved responses. Built the system using FastAPI and containerized it with Docker for scalable deployment.

CERTIFICATIONS

- INTRODUCTION TO PYTHON PROGRAMMING-REDHAT
- JAVA FOUNDATIONS - ORACLE ACADEMY
- MACHINE LEARNING- ISTOP.AI
- INTRODUCTION TO ARTIFICIAL INTELLIGENCE- INFOSYS SPRING BOARD
